Subject: Microsoft Settlement

Judge Kollar-Kotally,

I urge you to reject the proposed final judgment in the U.S. vs. Microsoft case.

Every court has found that Microsoft violated antitrust laws, making billions of dollars in the process. This proposed settlement would allow the company to keep virtually all of those illegal profits!

There is also no provision that would prevent Microsoft from continuing its anti-competitive behavior. In fact, the monopoly is validated and furthered under the PFJ through the dissemination of Microsoft software to our schools. And Microsoft cannot be allowed to essentially police itself.

Please vote against the PFJ in the interest of the public.

Sincerely,

Donna Rogers
